LOOK BOOK

1857

With a history that dates back to 1857, Kährs of Sweden is the oldest wood floor manufacturer in the world still in operation. For decades, Kährs has been a global leader with innovations that include the world's first patented multi-layer wood floor in 1941; the world's first water-based finishing system in 1984, and the first ISO 14001 environmental management certification in 1997.

QUALITY IN WOOD SINCE 1857

Wood is the most eco-friendly, beautiful and versatile flooring material there is. That's why we only work with wood. Few materials can add as much warmth and atmosphere as wood. It softens the most minimalistic designs, while accentuating the mood of a more traditional interior. While trends may come and go, quality and true style never goes out of fashion. That's why a wood floor from Kährs will always be the perfect choice.

SEASONS GREETINGS

Compared to a traditional solid wood floor, our patented construction is 75% more stable. A Kährs floor resists warping, buckling and cracking, even as temperature and humidity change throughout the seasons. The construction creates a perfectly balanced wood floor that can tolerate even the most dramatic climate changes. Making our wood floors the perfect partner for underfloor heating.

GAP FREE

When Kährs launched Woodloc® in 2000 – the first glue-free joint system in the world – it revolutionized the wood flooring industry. This ingenious joint system locks the boards together mechanically, creating a completely gap-free floor.

THE EASIEST INSTALLATION

Kährs floors are easy to install, thanks to the ingenious Woodloc® joint. The boards lock together mechanically, with virtually invisible joints, providing perfect results, fast! The superior fit also enhances the floor's performance and durability.

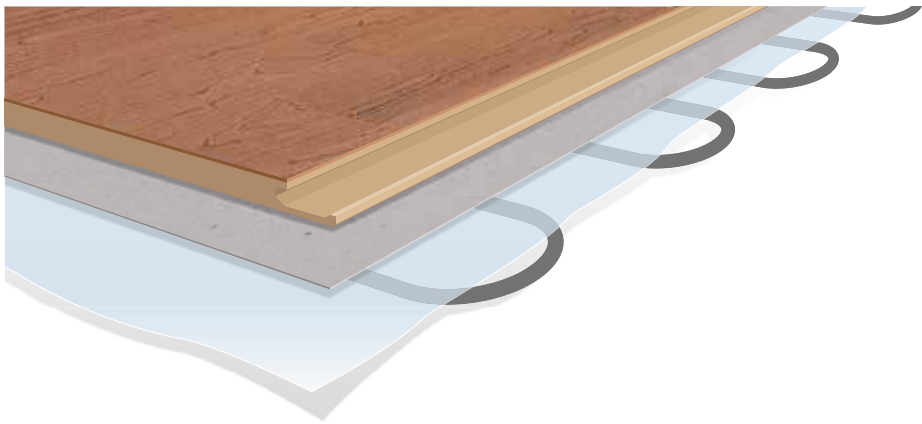

MORE THAN A BEAUTIFUL SURFACE

Whichever surface treatment you choose for your Kährs floor, you can be sure that it will both enhance and protect the natural beauty of the wood. All Kährs surface treatments are naturally free from solvents, formaldehyde and isocyanate. They also make the floor really easy to clean and maintain.

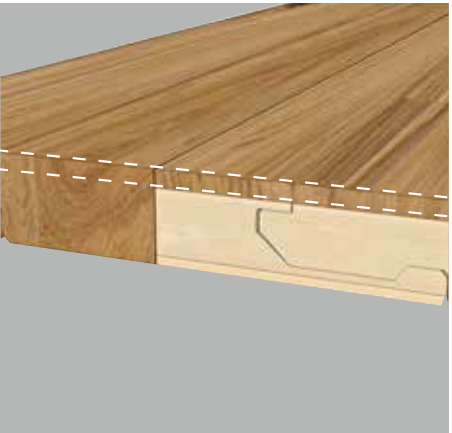

ENDLESS DESIGN VARIATIONS

Whatever the size of room or interior style, there's a Kährs floor that will enhance the space. Our wood floors come in many wood species, sizes, patterns and finishes.

UNDERFLOOR HEATING

Kährs wood floors are ideally suited to underfloor heating. Please visit www.kahrs.com for detailed installation and operating instructions.

SANDS LIKE A SOLID

The Kährs multi-layer construction uses hardwood down to the joint only, with fast-growing timber below. It can be refurbished in exactly the same way as a solid floor.

THE FINISHING TOUCH

It's in the detail that you'll see the level of skill and craftsmanship that goes into every product made by Kährs. Choose from a wide range of moldings and accessories, that are designed to add the perfect finishing touch.

LEED

Many of Kährs products contribute to LEED (Leadership in Energy and Environmental Design) points on construction projects. Please contact your local Kährs representative for the latest LEED information or visit www.kahrs.com.

BEAUTY WITH A CONSCIENCE

Choosing a wood floor is a great way of being environmentally responsible. By choosing a Kährs floor you are making a smarter, greener choice. Kährs is one of the oldest producers of wood flooring in the world – and the most innovative. During the last century, our many inventions have transformed the production of wood floors globally. Throughout this time, we’ve continued to capture the beauty and expression of wood. We combine its natural character with cutting edge innovation, to produce the highest quality wood flooring.

GREEN PRODUCT

The multi-layer wood floor, that we invented in 1941, proved not only to be the best and most stable flooring on the market; it was also the most environmentally friendly construction. It optimizes the use of the raw material, is made from renewable resources and is recyclable.

LESS RAW MATERIAL

Our multi-layered construction allows us to use the raw material more effectively, utilizing the whole log.

SOLVENT FREE

We constantly strive to find the most environmentally friendly, solvent-free stains and finishes. Also, our surfaces are easy to keep clean, without the need to use harsh chemicals.

GREEN PRODUCTION

Our production process is designed to have minimal impact on the environment. Over the years, Kährs has introduced a number of manufacturing and flooring innovations that have enabled a more responsible, green production. We work hard to reduce our impact on nature, in terms of air quality, water discharge and noise control, to the benefit of our employees and neighbors.

HEALTHY PRODUCTION HEALTHY FLOOR

In 1984, Kährs was the first wood flooring manufacturer to utilize a water-based finishing system to reduce emissions. Kährs meets European E1, Eo and California Air Resources Board – Airborne Toxic Control Measure (CARB-ATCM) Phase 1 and 2 standards.

NOTHING IS WASTED

At our production plant in Nybro, nothing goes to waste. The portion of the logs that we’re not able to use for floor production are turned into biofuel. Some of this fuel is used to heat our own facilities. The rest goes to a local energy company. About 45,000 people in our neighborhood enjoy the warmth of our recycled wood.

A GREEN MINDSET

Environmental, Social, Governance (ESG) and Corporate Social Responsibility (CSR) matters impact the communities where Kährs operates. We have made a public commitment to incorporate these ethical principles into the way we behave locally and globally.

Our commitment to the environment starts with the selection of the best raw material. This is achieved with the support of our 3000+ timber suppliers who share in our commitments.

PLANTING AHEAD

Kährs is working with local, national and global organizations to ensure the forest stock is sustainable for generations to come. In Sweden, the total forest volume is 60% larger today than it was in the 1920's. Kährs is working with leading global programs, reforestation programs and leading environmental groups to support globally responsible forestry.

ENVIRONMENTAL STANDARDS

Since the 1990's, Kährs' operations have been environmentally and quality certified. We have also been publishing a transparent and independent environmental audit results from EMAS since 1997. EMAS is the voluntary environmental regulation within the EU. Its purpose is to promote environmental control, environmental improvements, and environmental audits within industry.

Many of Kährs' products contribute to LEED (Leadership in Energy and Environmental Design) points on construction projects.

KÄHRS FLOOR GUIDE

Kährs offers a wide range of products with different finishes to meet the most diverse needs. All Kährs finishes´ are created by nature, engineered with the latest technology and produced with great respect for the environment.

NATURAL OIL

Kährs oil reinforces the natural look and is incredibly tactile. The oil brings out the fine structure and grain of the timber yet adds depth to the natural wood tone. Kährs floors treated with oil are easy to maintain.

MATTE FINISH

Our matte finish creates the impression that the floor is made from untreated bare wood. The soft to touch natural surface is incredibly tactile and pleasing underfoot. Matte finish is durable and easy to maintain.

SILK MATTE FINISH

Our silk matte finish complements the wood's character by emphasizing its natural structure. Making the floor durable and easy to clean, without concealing wood's natural luster.

HIGH GLOSS FINISH

The high gloss finish gives your floor a shiny, polished look that enhances the beauty of the wood species you have chosen. It also protects your floor from everyday wear and tear.

BRUSHED

Brushing the surface highlights the natural structure of the grain and creates additional texture. Brushing is usually accompanied by other surface treatments such as a beveled edge or a colored stain.

STAINED AND SMOKED

Both staining and smoking are used in our production and design process to enhance the natural tone of the wood and to add color. Our floors come in a vast spectrum of shades, from the palest white and greys, to the darkest brown and inky blacks.

BEVELED EDGES

Beveling the edges of a plank floorboard accentuates its shape. From a micro-bevel (a slight accentuation of the edge using sandpaper) to a more dramatic, stronger bevel on all edges, this design feature gives the floor a more distinct look.

HANDSCRAPPED

The rich character surface that provides a truly rustic feel is created by hand, using different wood scraping and sanding tools. It creates a wood floor with the look and feel of an old floor worn by time.

GRADINGS

Throughout 2017-2018 Kährs will be transitioning to a new concept of communicating timber gradings to better convey the nature of our products´ visuals. The new grading concept will better reflect and accommodate our entire flooring range and focus on the appearance of the floor and how the planks interact with each other. These new classifications start with Calm and intensify to Expressive.

CALM (CITY)

These floors are produced from our cleanest boards; with a uniform appearance, small variations in grain and tone and may contain small knots.

VARIATION (TOWN)

The floors with this grading are characterized by subtle variations in color, tone and pattern and may contain small knots.

LIVELY (COUNTRY)

The Lively floors feature dramatic graining, gnarls, and knots. They boast greater color variations while having a lively rustic character.

DYNAMIC

These floors are made from planks with knots and cracks that give them a dramatic character with greater color variation.

EXPRESSIVE

Expressive floors showcase a strong presence with dramatic cracks, powerful knots, and a wide color variation.

SUPREME QUALITY AND CRAFTSMANSHIP

Using time-honored skills, Kährs combines unrivaled hand-made craftsmanship, outstanding design and the latest production and surface techniques to create a floor of distinction. Unique floors in Oak, Ash, and Beech come to life in an array of designs and finishes, all united by striking, exclusive looks and absolute attention to detail.

THE FOUNDATION OF QUALITY

The Kährs’ Original range has grown into our largest and most popular line of wood floors. Available in a wide variety of wood species and finishes – and inspired by our Scandinavian roots – every floor is a true classic.

OUR INTRODUCTORY RANGE

With worldwide renowned quality and flexibility, Kährs Avanti presents our most popular wood species and gradings paired with popular colors and styles.

LONG-LASTING BEAUTY

Beauty isn't always fleeting – particularly when it comes to Kährs Spirit. Thanks to their durable finish and construction, floors from the Kährs Spirit range retain their beauty for years making them perfect for your home or commercial needs.

THE PERFECT FIT

Measuring just one quarter inch in thickness, the slender profile of Linnea offers a low-impact, real wood flooring option for any space. These beautiful wood veneer floors bring unrivaled style to the home, making it a modern, natural choice.

CONCEPTUAL DESIGN

Kährs ID is our brand new concept for developing the next generation of cutting edge wood floors. Based on our extensive experience of working with wood, and the traditional methods of wood floor manufacturing, we've explored and developed new pathways and possibilities.

THE FOUNDATION OF QUALITY

Kährs Activity Floor is a wood floor specially designed for sports. A result of long-term research, it combines excellent energy-absorbing qualities with durability and good looks. Kährs Activity Floor creates an optimal surface for all types of sports and the patented construction promotes fast, simple installation.

HOW TO USE THIS BINDER

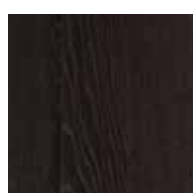

1. On the following pages you can view the Kährs product selections arranged by color.
2. To view more information about a product, turn to the page indicated to the right of the product name.
3. On the product page you will be able to see larger photos of the sample as well as interior photos (if available), profile construction, board reference, and shipping specifications.
4. To order a sample email info@kahrs.com

PRODUCT SELECTION GRID

Using this product selection grid you are given a bird's eye view of our products organized by color. Each product is listed with a page number allowing you to see additional information and photos for that product.

You may order samples of the products simply by emailing the product requested and your shipping information to: info@kahrs.com

Quarter Round

Conceals expansion space between the wall and Kährs hardwood flooring. Also used to transition between wood flooring and cabinetry.

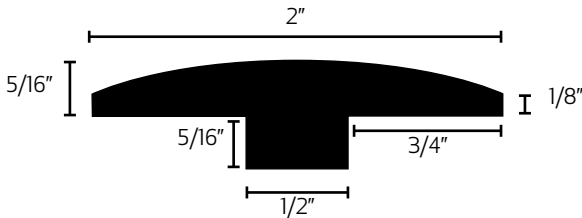

All Floors	3/4" x 3/4" x 78"	10lbs	10 pieces
------------	-------------------	-------	-----------

Wall Base

Provides an elegant, traditional transition from the flooring to wall. Gives any room a more formal, finished appearance.

All Floors	5/8" x 3 1/2" x 78"	25lbs	5 pieces
------------	---------------------	-------	----------

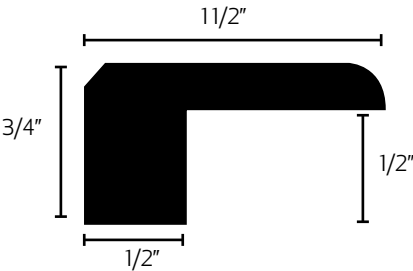

T-Molding

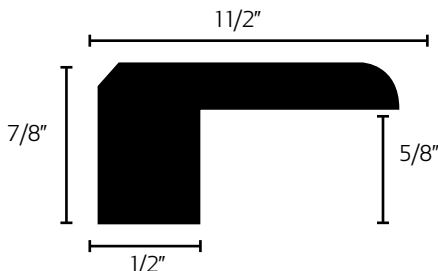

Used in doorways to blend flooring surfaces in adjoining rooms or where floors of the same thickness meet

All Floors	2" x 11/16" x 78"	25lbs	5 pieces
------------	-------------------	-------	----------

7mm | 10mm

12mm | 13mm | 15mm

Square Nose Reducer

Installed against vertical surfaces such as patio doors or fireplace hearths.

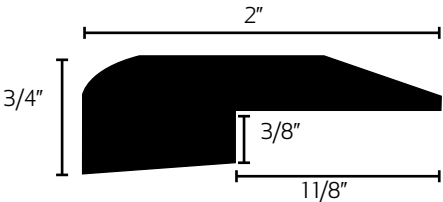

Kährs Linnea (7mm) Kährs Spirit (10mm)	1 1/2" x 3/4" x 78"	10lbs	5 pieces
Kährs Avanti (12-13mm) Kährs Original (15mm)	1 1/2" x 7/8" x 78"	10lbs	5 pieces

Threshold

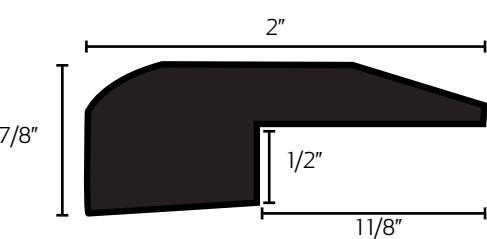

Ideal for doorways or to transition between floors of different heights. Used with wood, tile or carpet.

Kährs Linnea (7mm) Kährs Spirit (10mm)	2" x 3/4" x 78"	10lbs	10 pieces
Kährs Avanti (12mm & 13mm) Kährs Original (15mm)	2" x 7/8" x 78"	10lbs	5 pieces

7mm | 10mm

12mm | 13mm | 15mm

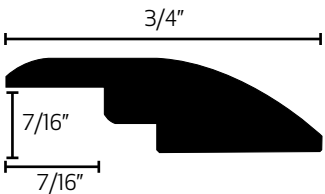

Overlap Reducer

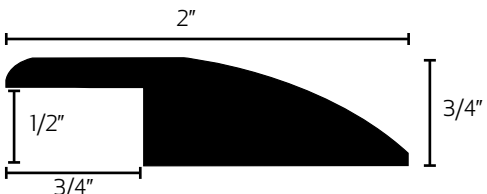

Used with floating floor applications to provide a smooth transition between floors of different heights. Overlap profile allows the installed flooring to expand and contract.

Kährs Linnea (7mm)	1/2" x 3/8" x 78"	10lbs	5 pieces
Kährs Spirit (10mm)	2" x 3/4" x 78"	10lbs	5 pieces
